

Infrascope: The Enabling Environment for Public-Private Partnerships

Tunisia

Public-private partnerships (PPPs) are an integral part of Tunisia's national development plan, Tunisia 2020, and since 2016, the country has made considerable advances in strengthening its institutional and legal capacity to manage PPPs. In 2015 the country passed PPP legislation in line with international standards, followed by the establishment of an agency to supervise PPPs in 2016. In 2018, Tunisia held a major policy forum on PPPs, and has announced that it will tender US\$4.7 billion in PPPs for infrastructure contracts.

Overview

Since Tunisia's revolution in 2011, the Tunisian government has been engaged in an economic transition that aims to build a more inclusive economy through sustainable growth. A key objective of the current development plan, Tunisia 2020, is to stabilise public debt below 70% of GDP by lowering the fiscal deficit, while boosting foreign investment. Legislative reform to encourage private sector financing in development projects and, particularly, upgrading infrastructure across the country through PPPs, has therefore been seen as essential by the government.

Tunisia 2020 aims to implement 22 transport projects worth US\$2 billion, such as constructing the Enfidha deep-water seaport, constructing a new highway network, and potentially the building of a new international airport for the capital city. The government has also announced the investment of at least US\$1 billion towards renewable energy projects. In September 2018, the Minister for Development Investments and Foreign Cooperation announced that Tunisia will offer PPP projects worth US\$4.7 billion to revive the Tunisian economy in the coming years.

Enabling environment

The centrality of PPPs in Tunisia's development plans is reflected in a recent expansion of the PPP institutional and legal framework. With the passing of the PPP-specific Law n. 2015-49 of November 2015 and the concession contract Decree No. 2014-1039, Tunisia has established a clear legal framework for PPPs. Law n. 2015-49 guarantees free competition and transparency in the tendering process; selects a mode of procurement that maximises benefits for government and end-users; and develops innovative evaluation criteria, such as performance-based measures that reflect the employability rate and benefit for the local economy.

In addition to the already existing Competition Council that advises the Minister of Commerce and Handicrafts in procurement, Tunisia has established the General Authority for Public Private Partnerships (IGPPP) in 2016 that gives technical assistance to all stages of the PPP process and gives final approval to PPP projects. To encourage transparency and mitigate corruption, Tunisia also finalised an e-procurement system (TUNEPS) in 2018 that monitors all public procurement. Finally, in September 2018, Tunisia held a large, international public forum on PPPs, during which the Tunisian government publically embraced PPPs within their development strategy, and signed memoranda of understanding around PPPs with public sector financial institutions and international development banks.

Country environment

Number of PPPs to date ¹	6
GDP ²	US\$39.5 bn
GDP at purchasing power parity per capita	US\$11,900.0

Challenges of PPP development

Tunisia is one of the few countries that had a relatively peaceful democratic transition after the Arab Spring revolutions. However, political violence and occasional terrorist attacks following the revolution, together with the war in neighbouring Libya, have led to a steady decline in direct foreign investment, and economic growth has averaged at about 1.5% annually compared to 4.5% annually before the revolution.

A lack of transparency and efficiency in the public sector bodies that partner in PPPs is still a hindrance to investor confidence. The code of corporate governance in the public sector is out-dated and often not enforced, and while a new code managing competition was passed in 2015, its implementation is still weak. The guidelines for the coordination between different ministries involved in PPPs are not sufficiently clear and a project development fund specific to PPPs has not been established. No PPP-specific manuals for public contracting authorities exist and within ministries PPP technical capacity needs to be strengthened. Finally, the IGPPP is still underfunded and understaffed, and requires more formal ties with Tunisia's National Authority for the Fight Against Corruption (INLUCC) in order to increase transparency in the public sector and establish investor confidence.

Strengths of Tunisia's PPP enabling environment

- Strong legal framework for the implementation of PPPs (1.1.1)
- Existence of PPP-specific agency that delivers technical assistance at all stages of projects (2.1.1)
- Checks and balances to ensure independence of PPP-specific agency (2.2.2)
- High-level of government support and political will for PPPs (4.3.1)
- Clarity of criteria (1.2.2) and economic principles for project selection, including cost-benefit and value for money analysis (1.2.3)
- Robust monitoring, evaluation, and auditing of PPP contacts (2.4.3), (2.4.4), (2.4.5)

Focus areas in order to strengthen Tunisia's PPP enabling environment	Effort	Impact	Time frame
	Liloit	ППрасс	Tillie ITallie
Institute ways to make changes or renegotiate PPP contracts to include compensation mechanisms, oversight and public disclosure $(1.7.1.c)$, $(1.7.2)$, $(1.7.2)$, $(1.7.3)$	Low	High	Short term
Implement codification of PPP procurement in guidelines and manuals (1.1.2)	Low	High	Short term
Invest in additional staff and funding for the PPP agency (2.1.2)	Medium	High	Short term
Strengthen framework related to contingent liability management, including planning, budgeting, and accounting (1.5.1.a) and for delayed investment payments (1.5.1.b)	High	High	Medium
Create a specific fund for the development of PPP projects (2.3.1.b), (2.3.2)	High	High	Short term
Determine avenues for appeal for investors in case of contract termination by government (3.3.1.a)	High	High	Medium term
Include a focus on climate resilience in PPP regulation (1.8.3), (1.8.4.a)	Medium	High	Medium term
Attract institutional investors that have not yet participated in PPP projects (5.3.1)	High	Medium	Long term

Methodology note: The full methodology for this study can be found at infrascope.eiu.com

What is Infrascope?

The Infrascope is a benchmarking index that assesses the capacity of countries to carry out sustainable public-private partnerships (PPPs) in infrastructure. The first study was developed in 2009 and updated in 2010, 2012 and 2015; the 2017 iteration features a new methodology. The analysis and content of this index cover the period from August 2018 to July 2019. The index was built by The Economist Intelligence Unit and is supported financially by the Millennium Challenge Corporation (MCC) alongside the Inter-American Development Bank, the European Bank for Reconstruction and Development and the Asian Development Bank. The views and opinions expressed in this publication are those of The Economist Intelligence Unit and do not necessarily reflect the official position of the sponsors, who commissioned the work.

The complete index, as well as detailed country analyses, can be viewed on the following website: http://infrascope.eiu.com

Please use the following when citing this country summary:

The Economist Intelligence Unit. 2019. Measuring the enabling environment for public-private partnerships in infrastructure: Tunisia country summary. EIU, New York, NY.

Note: The 'number of PPPs to date' figure includes all PPPs listed in the World Bank PPI database, accessed via the custom query function in June 2017. The number includes all project status types and PPI types for all sectors except ICT.

Stephen Gaull, Senior Operations Advisor, Public-Private Partnerships & Private Sector Development: gaullsb@mcc.gov

The Millennium Challenge Corporation (MCC) is an independent U.S. Government agency focused on reducing poverty through economic growth. MCC seeks to bring public-private partnerships (PPPs) to market in MCC partner countries to support the agency's mission. MCC can provide a full suite of blended finance solutions across the PPP cycle, covering upstream enabling environment and downstream project preparation and deal facilitation, including support for transaction advisors, viability gap funding, and guarantees.
